

## CIVIC ART GALLERY

With the "Galleria Civica", the city recovers an exhibition space of its own, enriched with the collections and competences of the Mart (Art Museum in Rovereto). The Galleria's activities are developed on specific themes that range from the most contemporary examples to projects of the 19th and 20th centuries, exploring the languages of art and architecture. The Galleria Civica is also home to the ADAC, the archive of contemporary artists from Trentino.

## PARK AND MAUSOLEUM OF CESARE BATTISTI – DOSS TRENTO

Solemn and of impressive architecture, the Mausoleum, dedicated to Cesare Battisti, dominates the city from the top of Doss Trento, the hill that rises 309 metres above sea level, on the right bank of the Adige river. It is easily accessible from the city, following a path that leads directly to the summit.

## VANTINI CHAPEL

In 1831, the architect Rodolfo Vantini (1792-1852) was commissioned to restructure the palace of the Counts of Thun on Via Larga, now Via Belenzani, according to a late neoclassical taste that recalls models of the 16th century Italian tradition. Four years later, the elegant and sober chapel was decorated by Tommaso Castellini (1803-1869) and Luigi Lorandi (1814-1888) with monochrome decorations of neo-Renaissance inspiration. Today, the Vantini Chapel, the exhibition room of the Thun Palace in Trento, houses temporary exhibitions.

## FORTE CADINE

The Cadine-Bus de Vela Fort is a road defence fortification built between 1860 and 1861. Its purpose was to block the access to Trento, controlling the Bus de Vela gorge. The closure of the road did not rely merely on a gate, but on the entire building: this makes the structure unique among other road defence fortifications in Trentino. Restored and fitted out, it is managed by the Fondazione Museo Storico del Trentino, and can be visited in specific times of the year.

## Lakes Valley

### LAKES

About a dozen enchanting little mountain lakes, vineyards producing wines with unique scents and flavours, beautiful villages and medieval castles. The Lakes Valley is a picturesque and unique territory thanks to its micro-Mediterranean climate.

### SPORT

Just a stone's throw from the city, the surroundings offer everything a sports lover could ask for: hiking trails, climbing ways, trekking and mountain bike tracks, paragliding and hang gliding. A marvellous experience: untouched nature, mountain landscapes and water sceneries are the ideal choice for families looking for a peaceful oasis and for outdoor-life lovers.

The Lakes Valley is also the land where an appreciated wine, Nosiola, is born and cultivated. This wine comes in several forms: dry white wine, brandies distilled from grape marc and the sacred wine, the precious Vino Santo Trentino DOC. Three products that also represent the history, the cultural and oenological heritage of this land.

## OENOLOGY AND GASTRONOMY

### LOCAL FLAVOURS AND CRAFTS

Spend your holiday amongst alpine cottages, surrounded by pristine nature and our local animals, taste local flavours and traditional dishes. Witness the transformation from ingredients to products unfold before your eyes. In the old town you will also find restaurants, cafés, and typical wine shops. Lastly, come and admire the craft products on sale in the windows of the tourist office!

Trento has a strong connection with its territory. In Roccabruna Palace – the House of Trentino's products – it is possible to sample local wines. There you will find a rich calendar of exhibitions, Trentodoc wine, food events and other products. To understand how the uniqueness of a wine like Nosiola comes to life, discover the origin of Vino Santo and learn more about the distillation process of our grappas, a taste is essential!

## TRENTO OVER THE CENTURIES

### COUNCIL CITY

Thanks to its position between southern Europe and the German-speaking area, from 1545 to 1563 it was home to the council that reformed the Catholic Church in response to the explosion of the Protestant doctrine. There is still evidence of the previous town and architecture that enriches this city's cultural atmosphere even further.

### TRIDENTUM

Founded by the Romans, Trento still preserves many elements linked to that time. Starting with the underground archaeological space under piazza Cesare Battisti, which offers an example of Roman town, displayed in a singular environment. Do not miss a visit to the area around Palazzo Lodron (Piazza Lodron) and the Paleochristian basilica (under the cathedral of Piazza Duomo).

### RENAISSANCE TRENTO

It is not hard to recognise examples from that prosperous cultural period that animated Trento as well as other Italian cities. Strolling through the old town just glance up to discern precious Renaissance facades that decorate Palazzo Thun and Palazzo Geremia, homes of the Municipality, Palazzo Alberti Colico and, in piazza Duomo, the wonderful Case Rella.

## PLACES OF INTEREST - MUSEUMS

### CATHEDRAL OF TRENTO... AND OTHER IMPORTANT CHURCHES

The Cathedral of San Vigilio, better known as «Duomo di Trento», which gives the name to the square where it is located (Piazza Duomo), is the main Church of the Archdiocese of Trento. In Romanesque style, it was built on the site of an old basilica dedicated to Saint Vigil, patron saint of the city, which was buried in the same basilica, in the basement of the cathedral. The city also has many churches which architecture ranges from Romanesque to modern times. The most important ones are: the Church of Santa Maria Maggiore, the Church of Santi Pietro e Paolo, the Church of Sant'Apollinare, the Abbey of San Lorenzo and the Church of San Francesco Saverio.

### BUONCONSIGLIO CASTLE

The "Castello del Buonconsiglio" is the largest and most important historic building in the Trentino-Alto Adige region. From the 13th century up to the end of the 18th century it was the residence of the Prince Bishops of Trento, and it is made up of a series of buildings dating back to different eras. The castle contains numerous artistic and archaeological collections covering a lengthy period of time, going from prehistory to the first half of the 19th century. It also houses an extensive collection of paintings, frescoes, wooden sculptures, medals, glass items, books and objects of an ethnographic nature. Inside the «Torre Aquila» (Eagle Tower), you can admire a masterpiece of international Gothic style: "The Cycle of the Months", the sophisticated image of court life at the end of the Middle Ages (14th century).

### S.A.S.S. – Sas Underground Archaeological Space

Underneath the historic centre of Trento there is the ancient Roman city of Tridentum, the "splendidum municipium", as it was defined by the Emperor Claudius in 46 CE. Symbolic of Tridentum is the S.A.S.S. Sas Underground Archaeological Space: two thousand years of history, 1,700 sq. m of Roman city in a fascinating and picturesque setting. Visitors can also view the 3D reconstruction of the archaeological site showing what Tridentum was like in Roman times.

### MUSE – SCIENCE MUSEUM

The Science Museum of Trento, designed by Renzo Piano, dedicates six floors to topics such as science and nature, biodiversity, innovation and technology. Thanks to involving multimedia exhibits, MUSE explains the wonders of the alpine environment and the nature that surrounds us. Another focus lies in issues of global interest, such as sustainable development and environmental conservation, which are equally engaging.

### TRIDENTINE DIOCESAN MUSEUM

The Tridentine Diocesan Museum is located in Palazzo Pretorio, the first bishop's residence erected beside the San Vigilio cathedral, in the very heart of Trento. It displays a rich collection of art and culture from different churches in Trentino that range from the 11th to the 19th century. The route through the museum is enriched by an enchanting hallway that allows a view over the cathedral, as well as the possibility of visiting the archaeological space of Porta Veronensis.

### LE GALLERIE OF PIEDICASTELLO (THE TUNNELS)

"Le Gallerie" that once witnessed the passage of thousands of cars now tell the story of Trentino and its community. And they do it through a variety of media, with state-of-the-art technologies combined with painstaking historical research carried out by Fondazione Museo Storico del Trentino, which manages the exhibition space. Six thousand square metres, divided into two tunnels, in which events and exhibitions are held. It is not a museum, but rather a new way of telling the history of a community.

### PALAZZO DELLE ALBERE

The "Palazzo delle Albere", built in the 16th century and commissioned by the Madruzzo bishops, retains in its name the memory of the magnificence and delight of its gardens. In the spirit of the Renaissance with its keen interest in the culture of the "otia" (cultivate the spirit), the building preserves richly frescoed rooms. Scenes of everyday life alternate with the majestic figures of the Arti liberali (Liberal Arts) and of the Virtù (Virtues), which cover the room walls in the towers at the corners of the building.

### TORRE VANGA | VANGA TOWER

An exceptional medieval building, the tower was the Western bastion of the city's walls, which at that time were lapped by River Adige. Prince-Bishop Federico Vanga (1207-1218) ordered the erection of the building over a pre-existing fortification during the first years of his bishopric. A covered wooden bridge connected the tower to the opposite bank of the river, where the isolated Abbey of San Lorenzo stood. The Prince-Bishop Giorgio Liechtenstein was imprisoned in the tower during the revolt of 1407, and the building served as a prison also in the following centuries. Today, it is the seat of exhibitions of the "Soprintendenza per i Beni Storico-artistici di Trento".

### ORRIDO DI PONTE ALTO

The gorge near Ponte Alto has attracted tourists and inhabitants of the city of Trento since the 19th century. The so-called "Orrido" is a deep canyon, carved by the River Fersina over thousands of years. Here, in 1537, some of the oldest hydraulic works in the world were built in order to protect the city from floods. Two weirs give rise to magnificent 40 m high waterfalls that flow through red rocks, thus creating spectacular light effects.
